Lecture Topic	Introduction	10 Step Design Process Dieter Rams	Research Stakeholder Analysis	Articulating Design	Articulating Design Psychology	Usability	Dialogue Systems Technology (Siri+)	Dialogue System Design (Questions/ Feedback)	Dialogue System Design 2	Branding
Assigned	Good and Bad Design	Design a Game	Stakeholder analysis for games		Articulating Design HW	2 Subject Usability Test	Transcription & State Diagram	K-Scripts	K-Scripts 2	Make a Commercial
Due		Good and Bad Design Movie		Game + SHA			Articulating Design HW (NOT ASSIGNED)	Usability Test, Transcription & Diagram	K-Scripts	K-Scripts 2

Usability:

What did you experience in your tests?

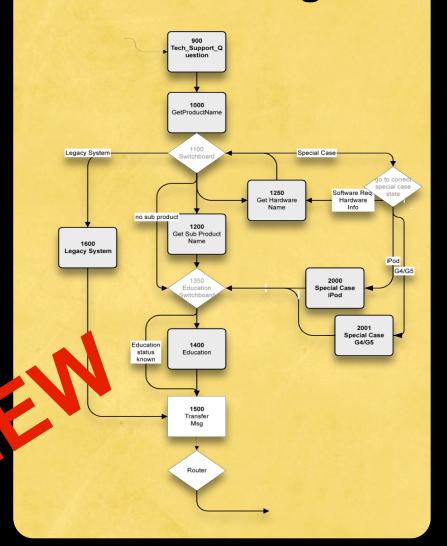

Usability: Mental Model Mismatch

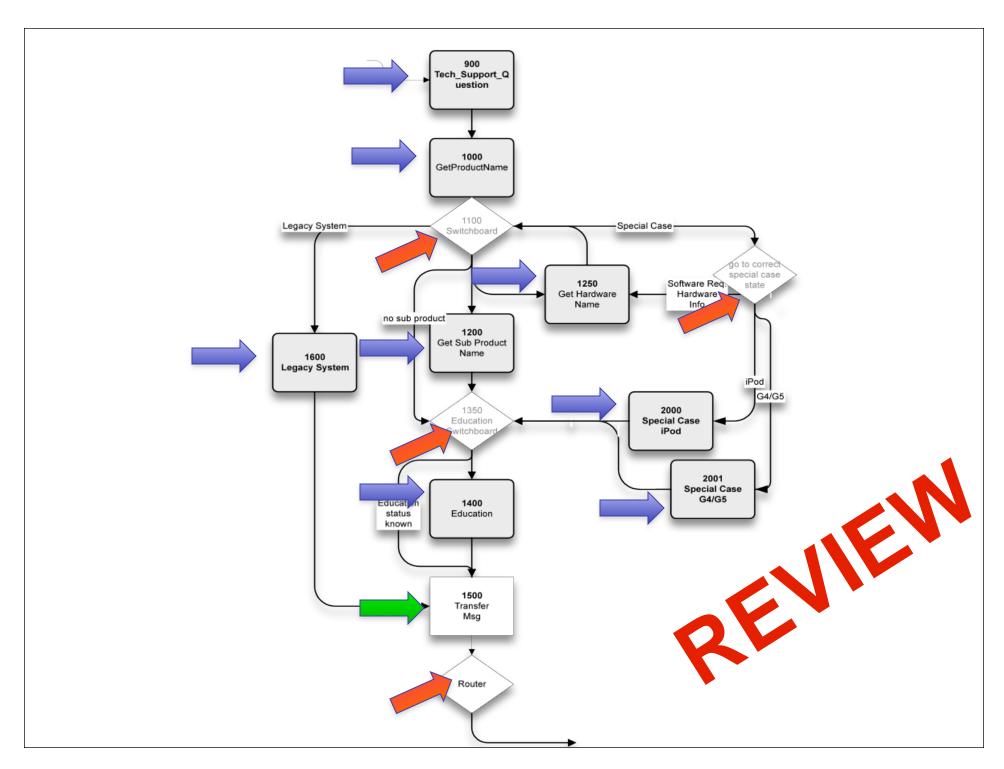

State Tables: The detailed design

Script

Who s talking	What they re saying
System	Welcome to Blue Cross of California, providing service to the Rita Trust. So I can know who you are, say either "Member" "Provider" or say "I'm none of those."
Caller	Member
System	Alright – how can I help you? You can say, "Claims", "Benefits" or "Eligibility". You can also say "More options" Go ahead:
Caller	Eligibility
System	Eligibility. Got it. Say the member ID. (you can find it on your Blue Cross ID card.) <pause> It's mostly numbers, but might contain letters also.</pause>
Caller	118A50675
System	and for security, what's the member's birth date. For example, you could say March 2 nd nineteen-sixty-three.
Caller	June 1 st 1975

Call Flow Diagram

For Dialog Systems: Brand New Question? Go to a New State, (generally...)

ENTRANCE

 User enters the new state and (generally) the system asks a question and listens for an answer

EXIT

- IF the system hears something that sounds like a good answer, the system exits that state performing an action
- IF the system hears something that may not sound like a good answer, the system asks the user for clarification, but DOES NOT EXIT the state, usually.
- IF the system hears nothing, the system asks the user for clarification, but
 DOES NOT EXIT the state, usually.
- IF there are too many failures, the state fails and exits on failure

 RNARDA GET

Detailed Articulation of the Design:

What's happening in each state of the dialogue system?

3. The Interaction State Table (chapter 5 of book)

Number	and	Name	of	intera	ction	state
		-	_	•	_	_

Speech Input

Entering from

Name of previous states that point to this one

Prompts		
Туре	Name	Wording
Initial		Text for the initial prompt
Timeout 1		
Timeout 2		
Retry 1		
Retry 2		
Help		

Option	Vocabulary	DTMF	Action	Confirm.
General Option description	What the system is listening for	If there can be a touch- tone equivalent, enter the number here	Go to: fill in the name of the state that the system goes to next	(If necessary /always)
				If necessary/ always

Other Module Settings / Notes

The Play-Prompt State Table

Number and Name of Play Prompt State

Play Prom	ıpt		
Entering fr	om		
Prompts			
Name	Condition	Wording	
	always		
Condition	Action		
Always			
Module Se	ttings		

3. The Branch-On-Condition State Table

Number and name of branch on condition state

Branch on Condition	<u> </u>
Entering from	
Condition	Action
IF .	Go to:
Else IF	Go to:
Else IF	Go to:

The 6 Principal Prompts

Initial prompt

Asks the user to provide some information

Timeout prompt (no input prompt)

 Asks the user to provide information, but also provides additional information to users when the system didn't hear audio for (approx.) 5 seconds

Timeout 2 prompt

 Asks the user to provide information, but may also inform users to use touch-tone equivalents or to ask for help

Retry prompt (no match prompt)

 Asks the user to provide information, but also provides additional information to users when the system didn't understand what the user said

Retry 2 prompt

 Asks the user to provide information, but may also inform users to use touch-tone equivalents or to ask for help

Help prompt

 Orients the user, clarifies the question / reasoning behind asking the question allows user to answer the question again, or may re-enter the initial prompt

Challenge!

In class exercise:

Write out the prompts for the pickup/delivery state of a Pizza Ordering line

The 6 Principal Prompts

Initial prompt

- "Would you like that order for pickup or delivery?"

Timeout prompt (no input prompt)

 Asks the user to provide information, but also provides additional information to users when the system didn't hear audio for (approx.) 5 seconds

Timeout 2 prompt

 Asks the user to provide information, but may also inform users to use touch-tone equivalents or to ask for help

Retry prompt (no match prompt)

 Asks the user to provide information, but also provides additional information to users when the system didn't understand what the user said

Retry 2 prompt

 Asks the user to provide information, but may also inform users to use touch-tone equivalents or to ask for help

Help prompt

 Orients the user, clarifies the question / reasoning behind asking the question allows user to answer the question again, or may re-enter the initial prompt

Challenge!

In class exercise:

Transfer Funds

Design Exercise – Banking: The Problem

- Design the part of the banking system for account-transfer & must confirm that the transfer is correct
 - System must collect transfer information (minimally, From, To, and Amount)

Design Exercise – Banking: The Requirements

- Background information
 - Accounts have numerical identifiers (9 digits)
 - your design starts AFTER the user has
 - called the bank
 - logged in (the system knows all the user's account information)
 - from the main menu says "transfer funds"
 - Your design is complete when the user is finished and sent back to the main menu

Coding?

Today:

We will go over the 3 simple features.

In class exercise.

You will implement a basic Pizza System

Coke Challenge!

Users call in

Choose "Pepsi" or "Coke"

Coke voters get an option of a prize: iPad, MacBook Air, iPhone 5, or a Dell...lol

Save votes in Data File

Welcome

Get "Pepsi" or

Negative Pepsi Comment Coke Voters choose prize

Confirm Prize

Ready, Go!

Homework:

Finish Pizza System at Home

Weather System:

- Provides weather information for your area.
- Develop K-Script
- Develop State Tables
- Call Flow Diagram
