

## **MITOCW | 8. Why do you like teaching this course for MIT's High School Studies program?**

---

PROFESSOR: So obviously, you know, teaching for USP is a lot of fun, and I enjoy it. In fact, I enjoy getting to see the different aspects of audio that come up when I'm doing the demonstrations and, you know, because the students design their own projects. So basically I'm just sort of guiding them along, and I see something different every year. We've had three different years and three different-- well, four different speaker designs so far. So I find that pretty fascinating. You know, it gives me a chance to get into the lab and into the hobby shop.
